

The Bio-Funnel Checklist

Turn one link in bio into a funnel that captures leads, not just a list of links. Built for small businesses and nonprofits. Work top to bottom, check one box at a time.

1 Pick your tool by your goal

- ☐ Write down ONE goal for your link: grow a list, book calls, sell, or collect donations.
- ☐ Linktree if you only need a hub (event, press, donate).
- ☐ Stan Store or a simple landing page if you want to capture emails or sell.

2 Make the first button a lead magnet

- ☐ Offer one free thing worth an email: a checklist, template, or mini guide.
- ☐ The button names the promise and who it is for.
- ☐ Ask for name and email only, nothing more.

3 Build the capture page

- ☐ One call to action above the fold, no competing links.
- ☐ Loads fast and looks right on mobile.
- ☐ Thank-you page delivers the freebie instantly.

4 Follow up automatically

- ☐ Welcome email within five minutes: deliver and set expectations.
- ☐ A two to three email nurture sequence.
- ☐ One clear next step: book, buy, join, or donate.

5 Nonprofit version

- ☐ Swap "buy" for "join" or "give".
- ☐ Free guide, then your newsletter, then a membership or donation ask.

6 Measure and improve

- ☐ Track link clicks, opt-ins, and opt-in rate.
- ☐ Aim for 20% or more of visitors opting in.
- ☐ Review monthly and improve one step at a time.

Want it built for you?

I set up marketing funnels for small businesses and nonprofits.
